***Allowable Subject Matter***

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 2, 4-12, and 14 are found to be in condition for allowance.

***Reasons for Allowance***

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a decoding apparatus comprising a setting means capable of changing a priority set as each of a plurality of encoded streams sets the priority according to a ratio between the size of a compressed streaming data and the size of an image to be displayed, and decoding means for decoding the plurality of encoded streams by decoding processing that is weighted according to the priority set by the setting means.

It is noted that the closest prior art of record Boyce et al. (US Patent no. 5805762) teaches a similar means for prioritizing, however, Boyce fails to particularly teach or suggest *"setting priority according to a ratio between the size of a compressed streaming data and the size of an image to be displayed, and decoding means for*

*decoding the plurality of encoded streams by decoding processing that is weighted according to the priority set by the setting means” as specified in the claims.*

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled “Comments on Statement of Reasons for Allowance”.
